

PIEZO BUZZER ORCHESTRA

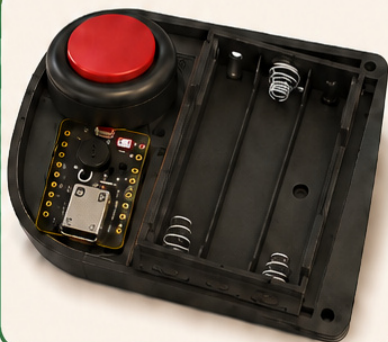

For many obvious reasons, I wanted to be able to light up a room with the glorious sound of the piezo buzzer. I wanted each unit to be individually addressable so I could connect them all with ESP-NOW and have them buzz at the click of a button, or at intervals.

BOTTOM VIEW

I had a bunch of old ESP32-C3s lying around from a previous LED project, so I started there.

It also uses piezo buzzers, 3x AAA battery holders, and 3D-printed parts, along with wiring and programming in Arduino IDE!
